## The Boater's Friend

### Don't Let Contaminated Fuel Ruin Your Summer Boating Season

Repair statistics show that 90% of diesel engine problems stem from contaminated fuel\*. The promise of eliminating 9 out of 10 potential failures should put fuel-system maintenance at the top of your list.

Gasoline engines can ingest a certain amount of water with the fuel without serious consequences, but if a single droplet of water in diesel fuel makes it all the way to the cylinder, the sudden steaming of the water can blow the tip right off an injector\*.

Contaminated fuel is only one-way water gets into the fuel aboard boats and other watercraft. Water can also leak in around the fill cap, or is occasionally driven in through a flooded vent fitting, which forms inside the tank as condensation.

Regardless if you have a gas or diesel engine, removing all condensation and contaminants from the fuel tank and lines is critical to your engine's performance.

### The Solution: Restore Your Fuel Tank and Lines Back to Their Original Condition with

**Thoro-Flush**  
COOLANT SYSTEM FLUSH

**CLEANS**

**HEATER CORES  
CLEARS DEX-COOL  
DIESEL OIL COOLERS  
FUEL TANK RESIDUE  
BIO & ETHANOL  
ALL COOLING SYSTEMS**

Safe for use on all metal and plastic  
Radiators, Cooling Systems & Fuel Tanks.

**Most POWERFUL flush available!**  
Concentrated powder formula  
activates when mixed with water.

**Danger:** See back panel for  
additional precautionary statements.

16 fl. oz. (455 ml) 468-9110-16

Part No. 468-9110-16

## Thoro-Flush

COOLANT SYSTEM FLUSH

- Fuel tank cleaner. Use before installing a new fuel pump to prevent premature pump failure and warranty claims.
- Removes ethanol/bio fuel build up, rust, scale, oils and other sludge from fuel tank.
- Safe for use on cast iron, aluminum, brass and plastic.
- Opens & cleans out plugged heater cores.
- Clears out gelled Dex-Cool with a simple flush.
- Diesel oil cooler failure, cleans cooling system in single flush.
